

INTERVENTION:- FIELD STONE PITCHING

**intervention:
Stone bunding
work was carried
out in six project
villages
Meghuwala,
Baniyawala,
Darpur, Pirthvipur,
Khilanwala, and
Sehjadwala, to
protect the soil
surface from
heavy rains**

ACTIVITY OUTCOMES :-

During the rainy season, stone pitching protects the soil surface from erosion. In six villages, 68 farmers were positively influenced. The average yield per acre increased by 40%, while the income generated per acre/farmer increased by 40%.

13 acres of uncultivated land bought under vegetation.
